Professional Summary

Backend Software Engineer with professional experience designing and delivering scalable production systems used across web and mobile platforms. Skilled in building reliable backend architectures, implementing secure authentication and payment workflows, and managing end-to-end application lifecycles from system design to production deployment. Demonstrated ability to translate complex business requirements into efficient technical solutions while maintaining performance, reliability, and maintainability. Published researcher in machine learning with a strong academic foundation and proven industry experience delivering real-world software products.

Education

American International University-Bangladesh (AIUB) 2020 – 2024
B.Sc. in Software Engineering *CGPA: 3.81 / 4.00*

Professional Experience

Backend Software Engineer Feb 2025 – Present
Spark Tech Agency

- Architected backend systems for production serving web, Android, and iOS applications.
- Designed scalable REST APIs, role-based systems, and multi-tenant data models using Node.js, Express.js, and MongoDB.
- Implemented subscription billing using Stripe, Flutterwave, and Paddle including trials, coupons, upgrades, downgrades, referrals, and webhook automation.
- Built real-time features using WebSockets including chat, notifications, and live application updates.
- Managed production deployments on AWS, Hetzner, and Hostinger using Nginx reverse proxy, SSL configuration, and CI/CD workflows.
- Configured Linux servers, email infrastructure, and backend monitoring for production reliability.

Junior Backend Developer Nov 2024 – Feb 2025
Spark Tech Agency

- Developed backend APIs and business logic using Node.js and Express.js.
- Optimized MongoDB queries using indexing and aggregation pipelines improving API performance.
- Handled debugging, production issue resolution, and feature delivery across multiple live applications.

Technical Skills

- **Backend:** Node.js, Express.js, REST API Architecture, WebSockets
- **Databases:** MongoDB (Schema Design, Aggregation, Transactions), MySQL
- **Authentication & Payments:** Keycloak, JWT, OAuth2, Stripe, Paddle, Flutterwave, PayPal Billing
- **Cloud & DevOps:** AWS, Docker, Nginx, Linux (Ubuntu/Fedora), CI/CD, VPS Deployment
- **Frontend:** React.js, Tailwind CSS, Bootstrap
- **Languages:** JavaScript, C#, Python, C++, Java
- **Tools:** Git, GitHub, Postman, Selenium, , AI-Assisted Development (GitHub Copilot, ChatGPT, Claude etc)

Key Projects

Dealr – Restaurant Deals & Activity Discovery Platform 2026

Backend System & DevOps Infrastructure

- Designed and developed the complete backend system for a platform enabling users to discover restaurant deals, food spots, and nearby activity centers across a unified experience.
- Architected the database schema and system design with emphasis on scalability, performance, and reliable API delivery for mobile and web clients.
- Managed full DevOps infrastructure including deployment pipelines, production server configuration, and system monitoring to ensure high availability and stable releases.
- Integrated subscription and offer management features supporting exclusive partner deals and user-facing discovery workflows. dealrapp.de
- **Mobile Apps:** Available on Google Play and App Store

Deenyah – Umrah Badal Platform 2026

Backend System & DevOps Infrastructure

- Architected a complete backend for a faith-based service marketplace connecting users with verified Umrah service providers, covering users, providers, orders, and transaction workflows.
- Designed complex domain models ensuring scalable, consistent system behavior across all service layers.
- Built real-time order tracking and secure payment workflows to deliver a reliable cross-platform experience.
- Managed production deployment via Nginx with SSL configuration, ensuring high availability and security.
- **Live Platform:** deenyah.com
- **Mobile Apps:** Available on Google Play and App Store

Publication

- Accelerating Model Averaging with Cluster-Based Approach Using Class Occurrences, *Springer Neural Computing and Applications*, 2025.

Achievements

- Dean's List Award Recipient
- Springer Published Researcher (Federated Learning)

Leadership & Activities

- Communications Executive, AIUB Environment Club (2023 – 2025)
