Professional Summary

Backend Developer with a strong foundation in Node.js, ASP.NET Core, and database management. Experienced in API development, real-time communication, and secure payment systems. Familiar with containerization and cloud deployment, with published research in machine learning.

Education

American International University-Bangladesh (AIUB) **March 2020 – May 2024**
B.Sc. in Software Engineering *CGPA: 3.81 / 4.00*

Experience

Backend Developer **Feb 2025 – Present**
Spark Tech Agency

- Designed and developed RESTful APIs and integrated third-party APIs for enterprise applications.
- Implemented real-time communication features using WebSockets for chat and notifications.
- Integrated secure payment processing systems, including Stripe, to support subscription and transaction workflows.
- Collaborated closely with full-stack team members to deliver scalable, high-quality software solutions.
- Worked with version control (Git), cloud platforms (AWS), and hosting services (Hostinger) for deployment and maintenance.

Software Engineer Trainee **Nov 2024 – Feb 2025**
Spark Tech Agency

- Assisted in developing backend features and APIs using Node.js and Express.js.
- Contributed to code reviews, debugging, and performance optimization tasks under senior guidance.

Technical Skills

- **Languages:** JavaScript, C++, C#, Java, Python, HTML, CSS
- **Frameworks & Libraries:** Express.js, React.js, ASP.NET Core, Tailwind, Bootstrap
- **Databases:** MongoDB, MySQL
- **Tools & Deployment:** Git, Docker, CI/CD, Linux, Nginx, AWS, Hostinger, Hetzner

Projects

Deenyah – Umrah Badal Platform **2025**
Node.js, Express.js, MongoDB

- Built and maintained the backend of a faith-based platform enabling Muslim users to perform *Umrah Badal* through web and mobile applications.

- Designed RESTful APIs using Express.js and MongoDB to manage users, orders, service providers, and transaction workflows.
- Integrated secure payment processing and order tracking to ensure reliable and transparent service execution.
- Deployed and managed the backend on Hostinger using Nginx for performance, scalability, and production stability.
- **Live:** deenyah.com
- **Apps:** Android — iOS

HavnProp.io – Real Estate Platform **2025**

Node.js, Express.js, MongoDB, Stripe

- Developed a full-featured real estate platform with subscription-based access for property listings and management.
- Implemented subscription purchases, upgrades, and cancellations using Stripe Pricing Tables for seamless billing management.
- Built secure and scalable RESTful APIs using Express.js and MongoDB to support web and mobile clients.
- Deployed the application on Hostinger using Nginx, ensuring reliable performance, uptime, and production stability.
- **Live:** havnprop.io

Publication

- **Accelerating model averaging with cluster-based approach using class occurrences**, Springer Neural Computing, 2025.

Achievements

- Dean's List Award: Spring 2020–2021, Fall 2021–2022
- Research on Federated Learning published in Springer

Extra-Curricular

- Communications Executive, AIUB Environment Club (Jan 2023 – Mar 2025)
